Healthcare Developments to attend Michigan Education Workshop

BETA Design is again proud to be associated with the upcoming MSBO Conference in Detroit on April 29 and 30. We are not only long term supporters of MSBO, but have been active participants and have conducted numerous clinic at the annual conference ranging from Funding options to Energy reduction. While we have designed spectacular building as J.W. Marriot in Grand Rapids and numerous new school buildings, our specialties are renovation of present buildings along with passing Bond and Sinking Funds. Our “bread and butter” are helping schools design and install new energy efficient roofs, playground improvements, parking lot upgrades and energy efficient HVAC replacements.

BETA is taking an active approach on the potential Federal funding dollars that have been “promised” to the State for school improvements, roads, bridges and other infrastructural needs. We want to help YOU be ready with your needed projects once this money is released. BETA will help you prioritize your needs and have your project plans ready to go!

BETA has multiple years experience in Energy Reduction and has developed a low/no cost Energy Assessment that has not only saved hundreds of thousands of dollars for Michigan School Districts but has improved the comfort level for students and staff alike. Call Jack Timmer directly at (616) 235-6257- guaranteed to make your time worth it!

BETA’s goal is to actively help school districts improve student achievement and reduce the stress on your General Fund dollars by helping you make the best decisions available with regard to your building structures, equipment, and practices.

We look forward for you stopping by our booth and let us show you how we can help you improve your district.
